STEP 4

Fires

This house is made out of stone. It has shared walls that extend above the roof, functioning as firewalls. There is a ladder on the roof to the right of the two dormer windows. And while we're at it, that's quite a roof, isn't it? It's made out of tin - "Québec-style" sheet metal.

Don't you think it's one of the prettiest houses in the square, even though it's not as high as the others? Do you recognize it?

- a) Marie-Anne-Barbel House
- b) Fornel House
- c) Chevalier House
- d) Lambert-Dumont House
- e) Guillemin House

STEP 11

Heritage Protection

Between 1960 and 1980, major reconstruction and renovations were undertaken. The neighborhood had really earned a new lease on life! It began with the celebrated London Coffee House, in 1850 a well-known tourist attraction. This house was built in 1752 next to Anse du Cul-de-Sac Cove. Which one is it?

- a) Hazeur House
- b) Gaillard House
- c) Fornel House
- d) Chevalier House
- e) Estèbe House

ÉTAPE
5

Attack by Phips

In 1690, Governor Frontenac convinced the authorities that the city needed better protection. This is how the area came to be equipped with new fortifications with openings and no fewer than eleven firing slits for cannons.

Can you identify this structure?

- a) The fortifications
- b) The Royal Battery.
- c) The Dauphine Battery
- d) Batterie de la Reine (The Queen's Battery)
- e) Batterie de Vaudreuil (Vaudreuil's Battery)

STEP
6

Québec, a Port City

When this house was built, this was a very busy corner. It was thought that the jutting corner of one of the walls was in danger of being damaged by cartwheels. So builders decided to round off the corner in a *cul-de-poule*, or "hen's bottom" shape, as they put it.

That wall was not far from here. It's on the corner of which streets?

- a) Cul-de-Sac and Notre-Dame
- b) Saint-Pierre and Saint-Antoine
- c) Sous-le-Fort and Des Pains-Bénits
- d) Notre-Dame and Du Marché-Champlain
- e) Notre-Dame and Côte de la Montagne

STEP
10

A Time of Transition

Toward the end of the 19th century, banks, insurance companies, and credit institutions began setting up in the area.

Most of these institutions were on the same street. Which street do you think it was?

- a) Rue de la Barricade
- b) Rue Saint-Pierre south of rue Du Porche
- c) At the corner of Cul-de-Sac and Notre-Dame streets
- d) Côte de la Montagne
- e) Rue Saint-Pierre north of rue Du Porche

STEP
7

Siege of 1759 and the Battle of the Plains of Abraham

This is a beautiful house—very posh, and still standing despite the 1759 bombardments. It's a miracle, really. Perhaps it was the covering on the roof that protected it from fire. There it is, with 21 rooms and eight fireplaces. You can't miss it! Especially if you like museums.

- a) Gaillard House
- b) Fornel House
- c) Jean-Soulard House
- d) Guillemin House
- e) Estèbe House

STEP
8

Place-Royale, Public Square

It seems the king's bronze bust was once removed because it was getting in the way of traffic. Today however, he's very much there!

Which king is it?

- a) Louis XV
- b) Henri IV
- c) Louis XIV
- d) George III
- e) Champlain

STEP
9

The American Invasion

On December 31, 1775, the American "Continental Army" wanted to take the city by surprise. Their plan was simple: Montgomery would come around the cliffs from the west while Arnold would come around from the east. They would meet at the bottom of Côte de la Montagne.

Montgomery and his men were defeated in the west, as was Arnold in the east.

Where did Arnold lose his battle?

- a) Corner of De la Barricade and Dalhousie
- b) Corner of De la Barricade and Du Sault-au-Matelot
- c) Corner of Du Sault-au-Matelot and Côte de la Montagne
- d) Corner of De la Barricade and Bell
